

## The Right Salt Can Make all the Difference

**All salts are not the same.** Ordinary pool salts contain varying levels of undesirable contaminants that can result in challenges unique to salt water pools. Additionally, using salts not specifically designed for salt water pools or chemicals formulated for traditional chlorine pools can affect pools in a variety of ways, including:

- Staining
- Water Clouding
- Chlorine Demand
- Scaling on Chlorine Generator Cells
- Scaling on Pool Finishes
- Chemical Breakdown

Only use the **best salt** available and products specifically designed for salt water pools – **Pristiva Advanced 3-Step System!**

## PRISTIVA'S ACCESSORY LINE EACH PRODUCT IS ENGINEERED FOR THE UNIQUE NEEDS OF SALT WATER POOLS

### Pristiva Acid Enhance

- The much safer, phosphate & sulfate-free way to adjust pH & Total Alkalinity
- Specially designed liquid acid specific for salt pools that performs just like muriatic acid

### Pristiva Rapid Action Stabilizer

- The fast, effective way to raise stabilizer levels in salt pool water
- Starts working immediately for fast, effective results in reducing chlorine loss to sunlight

### Pristiva Salt Cell Cleaner

- Cleans cell of scale, organics, metallic deposits, etc. without prematurely damaging cell
- Only cell cleaner on the market that does not damage the metals in the cell

### Pristiva Salt Water Test Strips

- Convenient duo-pack of easy-to-use test strips
- Periodic water testing provides you the information you need to make the proper product additions in between visits to your local **Pristiva** professional

## Advanced 3-Step System

# we love salt pools too™

## The Pristiva Perfect Pool

**Pristiva's advanced 3-step system** for start-up and maintenance of salt water pools, sets a new standard of excellence in salt water care. Developed after extensive research and rigorous field testing, **Pristiva** was designed to meet the specific needs and challenges of salt water pools. The result is the **easy to use Pristiva 3-Step System** - our exclusive, proprietary, high-performance system that creates unmatched salt water protection, incredible comfort and picture-perfect results.

- **Simple**
- **Easy to follow**
- **Once per month application**
- **Specifically designed for salt water pools**

## Salt Water Pools. Rising to New Levels with Pristiva

Congratulations on your investment in a salt water pool. And now, with **Pristiva**, we can take your salt pool to the next level. Here's how!

- **Pristiva's Isotonic Advantage;** even **more refreshing** water that's **soothing to skin and hair** and **easier on eyes and noses** than a traditional salt pool
- **Pristiva's 3-Step System;** making it even easier to obtain **superior results** with **less maintenance, time** and **expense**
- **Pristiva's Premium Salt;** superior performance starts with the **very best pool salt** available for **less work** and **better results**.

## Requirements & Care

Salt water pools differ significantly from traditional chlorine pools. They require unique equipment and special care. With the proper support, it's an investment that will pay dividends in total pool enjoyment for years to come.

## Salt Water Pools Need Specialized Pool Care Products

Salt water pools require **specialized salt water pool care products** designed to perform inside the harsh environment of the salt water generator. Chemicals designed for use in **traditional** chlorine pools can break down as they pass through your generator, leaving your pool unprotected and your money wasted.

Only **Pristiva** invested in the **research** and **understanding** that allowed for the development of the **Pristiva Total Protection System**.

**Try it now** so you and your pool can **experience the difference Pristiva** makes!

## The Pristiva Advanced 3-Step System for Salt Water Pools

The **Pristiva 3-Step System** is the **most advanced start-up and maintenance program** for salt water pools available, providing unparalleled protection and water performance. The system itself consists of **three products** - **Pristiva Premium Salt, Pristiva Primer** and **Pristiva Premium Shock**.

### The 3-step system:

#### Step 1: Pristiva Premium Salt

- Used whenever the pool water requires salt to be added to maintain the proper salinity level
  - When a pool is freshly filled
  - At spring opening
  - Any time an appreciable amount of pool water has been lost due to backwashing, draining, leaks, etc.
- The desired salinity level is that which is recommended by the manufacturer of your electrolytic chlorine generator (ECG)
- Most systems operate at approx. 3,000 – 4,000 ppm
- The **highest quality salt available** for swimming pools
- **Least amount of undesirable impurities** like iron, phosphates, sulfates, organic contaminants, etc.
- Delivers **crystal clear, soft, soothing waters** unmatched by traditional pools

#### Step 2: Pristiva Primer

- Primes the pool for **immediate protection** against stains, scale and corrosion (common issues associated with salt water pools when products are used that were not designed for them)
- Delivers **superior** water clarity and comfort
- Added initially and then **once per month** to maintain maximum protection

#### Step 3: Pristiva Premium Shock

- The only shock treatment needed in a salt chlorinated swimming pool
- Used initially and then **once per month** thereafter
- Always applied immediately after the application of **Pristiva Primer** to keep it simple and easy
- Works with **Pristiva Primer** to deliver sparkling clear, comfortable pool water
- Boosts chlorine residual and tops up stabilizer level
